All NAVIGON Roads Lead To Synnex

Exclusive Partnership Makes NAVIGON's Innovative GPS Navigators Available Across Australia

Melbourne, 8th July 2009: Synnex Australia and NAVIGON AG, one of the world's leading providers of navigation systems, today announced that they have signed an exclusive partnership for the distribution of NAVIGON's GPS navigators in Australia. NAVIGON's innovative new product range will be available exclusively in all Harvey Norman, Joyce Mayne and Domayne stores around Australia.

German GPS maker NAVIGON has been at the forefront of GPS technology for over 17 years and has introduced many industry-firsts to the navigation market. Innovation and quality engineering are synonymous with NAVIGON throughout Europe. The new NAVIGON 1300, 3300max and 4350max are the first GPS devices on the market that learn from individual driving habits to recommend an optimal route.

"The GPS market is extremely competitive and to support our strong product portfolio, we need an efficient supply chain partner that has a strong logistics capability but also provides excellent customer service; and Synnex offers both," said Daniel Antonello, Country Manager Australia, NAVIGON AG.

"This exclusive partnership with NAVIGON really demonstrates the capability Synnex has in the retail market. We offer state based warehouses so our retail customers can access stock across Australia quickly and we have invested in our own fleet of trucks, so deliveries can be made much more often. For NAVIGON this means a much more flexible and cost efficient supply chain and we look forward to working with them," said Kee Ong, CEO, Synnex Australia.

NAVIGON's GPS navigators offer a unique combination of style and exclusive, useful features. Reality View (1300 and 3300max) and Reality View Pro (4350max) display photo-realistic 3D views with actual road signs and lane guidance for many highway interchanges and exits. The enhanced Lane Assistant Pro (3300max and 4350max) guides the user by displaying the correct lane to take well in advance of the next junction. And the NAVIGON 4350max even features Landmark View 3D bringing a new dimension to the map with richly-textured 3D landmarks across Australia. The device also includes a Bluetooth hands-free application.
