

NEW ReadyNAS® Ultra Range

The Digital Brain for Connected Homes

NETGEAR®
Connect with Innovation™

The first-ever storage system with media-shifting capabilities, enabling users to centralize their media and consume it in any networked location and on any networked device. Ideal for media enthusiasts wanting a fast, high-quality yet affordable storage solution to **store, share** and **protect** their high-valued media collections.

The First ReadyNAS for Home product family to include iSCSI support.

The First TiVo® compatible DVR network storage device (extend the capacity of your TiVo® box).

The First transcoding storage device with Orb™ (convert video formats on the fly for optimal streaming on PC and mobile device).

The First media shifting storage device with Skifta™ (access multimedia content while you're away on any connected DLNA® device).

Extreme performance for bleeding-edge prosumers, with over 80 MBps throughput.
